

Intern Data Engineering f/m

60% or more | Baden

Bring along your knowledge, your enthusiasm and your dedication – and take charge as a "Intern Data Engineering" at Axpo. We offer a variety of challenging tasks and projects, and the flexibility to present and implement your own ideas. The energy industry is changing; it is continuing to develop dynamically and innovatively. That's why we promote internal and external courses, coaching and digital learning opportunities to educate and further train our employees on both professional and technical topics.

What you will do

- Data modelling
- Further developing our deployed Azure services such as cognitive search
- Setting up cloud orchestration

About us

The Axpo Group produces, trades and distributes energy reliably for more than 3 million people and several thousand companies in Switzerland and in over 30 countries throughout Europe. Around 4500 employees combine the expertise from 100 years of climate-friendly power production with innovative strength for a sustainable energy future. Axpo is an international leader in energy trading and in the development of tailor-made energy solutions for its customers.

What you bring & who you are

- Basic knowledge in programming (Python, SQL and/or JavaScript)
- Interest in data modelling
- Familiar with a cloud platform is a plus
- Familiar with monitoring and visualization tools is a plus
- Familiar with Git is a plus

About the team

As part of our team, you will not only work on exciting and challenging tasks but also make a valuable contribution towards helping future generations. We offer a young, open and collaborative work atmosphere in a professional and innovative environment. You'll work in our offices in Baden or also have the possibility to work from home.
