

Trainee GBTS Software Engineering

Fly with us into the future and become part of the team at one of the most innovative aircraft manufacturers in the world.

The Software Engineering Trainee program at Pilatus Ground Based Training Systems (GBTS) has an opening for one year of intensive learning on the job for trainees. During this period, experienced engineers as mentors support young and local talents to become GBTS software specialists. This program offers the trainee an entry into the area of software development for training systems in aviation.

ENGINEERING & TRAINING SYSTEME

GBTS SOFTWARE

Your place of work: Stans, Schweiz

What you do:

- Continuously updating technical knowledge and skills by working with the trainer and by participating in DevOps project as well as programming sprints
- Familiarizing with aviation as well as with simulators and other training systems
- Integrating existing software products and getting platforms to work together
- Researching, designing and writing new software programs
- Testing new programs and fault finding
- Understanding requirements from engineering, test, verification, and validation and working closely within sprints of the agile software teams

What you bring:

- University degree in the areas related to software development
- Initial understanding of software architecture and programming in C++, JavaScript or Python
- Knowledge of go, JAVA, rust, or shell programming will be an advantage
- Solid knowledge of spoken and written English
- A self-starter mentality with good team player skills
